CLINICAL SKILLS ENHANCEMENT ON ADVANCED ENDODONTICS

This six-day course in "advanced endodontics" is specifically designed to help participants develop the skills they need to provide highest standards of care for patients needing endodontic treatment. It is delivered via effective teaching and learning, through didactic, demo, hands on and live clinical exposure on patients (supervised by senior clinician).

MENTORS:

Department Of Conservative & Endodontics
Dr Girija Sajjan, Mds, Prof & Head.
Dr Madhu Varma, Mds, Prof.

TOPICS COVERED:

1. Etiology and diagnostic aids for pulpal & periapical diseases.
2. Dental anatomy and its implications for root canal treatment.
3. Exposure to magnification in Endodontics LOUPES, SURGICAL MICROSCOPE.
4. Rubber dam isolation and patient preparation.
5. Minimal access preparation, pre-endo buildup.
6. Use of ultrasonics.
7. Stablishing glide path and apical gauging.
8. Rotary systems.
9. Irrigation protocols, intracanal dressings.
10. Thermoplastic obturation techniques.
11. Post- endodontics restoration.

DETAILS OF THE WORKSHOP

THEORY HOURS: 12-15 HRS.

Didactics in the form of lectures, clinical discussion, Live Demonstrations on patient.

CLINICAL HOURS: 30 HRS.

Exposure to different endodontic procedures on patients and rendering treatment

**PARTICIPANTS: MINIMUM 4-8
INTENSIVE 1 WEEK
PROGRAMME**
