

The Vishnu Implant Academy strives to ensure the highest possible standards of continuing education within the field of implant dentistry and provide a broader public with access to Vishnu Implant Academy treatment philosophies and guidelines . It does so by coordinating educational products, tools, and activities and developing educational concepts and curricula with the overall aim of educating all interested in implant dentistry .

Y. Jaya
Visakhapatnam

Joining the Implantology course in our college during my Intership period itself, was a Boon to me. I had an exposure to a variety of cases here, with a better understanding of case selection. The faculty are truly experts in this field, and are easily approachable. So learning this complex and modern field of Dentistry under such a Great Panel of Implantologists served me a greater edge as compared to others.

Trust me, it's the Best Place for any Dentist to become an Implantologist, where you create Beautiful Smiles in an exquisite Atmosphere !!

Being a part of 1st batch at 'VDC Implant Course' was truly a gift. The faculty takes active interest in making sure every student individually benefits from the course and rectifies their personal shortcomings.

From my own experience and also from speaking with other members of my course it is clear that the training we received was of the highest quality and ethical protocols were given utmost importance.
