Identification Number: NS-26

Date of report: 30/5/23

Date of exposure occurrence: 30/5/23

Time of exposure: 11 am / pm

1. How many uninterrupted hours had you been working when this exposure occurred?

2. Working Area:

A. Dental Laboratory

B. Dental clinics No. 4

C. Sterilization Area

D. Post-Graduate Clinics (specify department)

E. Other areas (specify)

3. Professional Category:

A. Dental Faculty Specialty if any

B. Dental Nurse

C. Dental Hygienist

D. Interns

E. Dental Student UG/ PG specify UG

F. CSSD Technician

G. Laboratory Technician

H. Attenders

K. Other (specify)

4. Have you had a previous exposure incident? Yes

No

5. If 'Yes', How many times have you been exposed? 1

6. Was the previous exposure documented? Yes

No

7. Did the exposure involve:

A. Blood

B. Saliva only

C. Blood and Saliva

8. Are you:

A. Right-Handed

B. Left-Handed

9. Were you:

A. Self-Exposed

B. Exposed by Another Person

10. Type of exposure:

A. Needle Injury

1. Syringe Needle Gauge

2. Suture Needle

B. Cut, Puncture, or Scrape by Other Instruments

1. Bur

2. Scalpel Blade

3. Wire (specify)

4. Hand Instrument (specify)

5. Endodontic instruments

(specify)

6. Scaler tips injury

6. Other (specify)

11. Describe the circumstances under which this exposure occurred. Be as specific as possible.

Patient came for Restoration

of 36;

Before starting the Restoration

prophylaxis has been done and

it accidentally got injured

to my left hand

12. Description of procedure in progress when exposure occurred:

- A. Oral Hygiene (e.g., prophylaxis, root planing, curettage)
- B. Restorative (e.g., amalgam, composite, crown)
- C. Root Canal
- D. Periodontal Surgery
- E. Oral Surgery (1. Simple extraction 2. Surgical extraction 3. Fracture reduction 4. Other (specify _____))
- F. Other than above mentioned procedures. (specify _____)

13. Where did the exposure occur?:

- A. Inside patient's mouth
- ☒ B. Outside patient's mouth
- C. Unknown
- D. Specify if any _____

14. When did the exposure occur?

- A. During use of the item
- ☒ B. After use but before disposal
- C. During or after disposal
- D. During cleaning
- E. Unknown

15. How did the exposure occur?

- A. While manipulating patient or instrument
 - 1. Patient moved and jostled instrument or sharp item
 - 2. While inserting needle in patient's mouth
 - 3. While withdrawing needle
 - 4. Other (specify _____)
- B. During surgical procedures
 - 1. Suturing
 - 2. Incising
 - 3. Other (specify _____)
- C. Handling equipment
 - 1. Passing or transferring equipment
 - 2. Recapping (missed or pierced cap)
 - 3. Removing needle from syringe
 - 4. Assembling or disassembling equipment
 - ☒ 5. During cleanup
 - 6. During or after oral prophylaxis procedures

7. Other (specify After use while disposal)

D. Collision or contact with sharp object

E. Disposal-related

F. Other (specify _____)

16. Personal protective equipment being utilized at time of accident: (check all that apply)

- A. Single Gloves
- ☒ B. Double Gloves
- C. Utility Gloves
- D. Mask
- E. Goggles
- F. Gown
- G. Other if any (specify _____)

17. Circumstances contributing to this exposure: (Choose all that apply)

- A. Difficulty with procedure
- B. Rushing Procedure
- C. Pressure from environment
- ☒ D. Location of equipment (e.g., handpieces, scaler tip etc.)
- E. Being distracted
- F. Poor visibility
- G. Poor positioning
- H. Not following procedure steps correctly
- I. Other (specify _____)

18. Description of exposure

- ☒ A. Needlestick
- B. Puncture
- C. Laceration
- D. Scrape
- E. Splash to Mucous Membranes
- F. Other (specify _____)

19. Location of exposure

- A. Finger/Thumb
- B. Hand, dominant
- ☒ C. Hand, non-dominant
- D. Face/Part of Face
- E. Arm
- F. Other (specify _____)

20. Depth of puncture or laceration

- A. Superficial scratch or puncture, no blood appeared
- ☒ B. Superficial scratch or puncture, some blood appeared
- C. Deep laceration or puncture wound, blood appeared

21. Amount of blood/body fluid person was exposed to:

- A. None
B. Minor, less than a droplet
☒ C. Minor, more than a droplet
D. Large amount
E. Unknown

22. How was the wound or exposed area cleaned?

- A. Washed with water only
☒ B. Soap and water
C. Chemical cleanser (specify _____)
D. Other (specify _____)

23. Has the DHCW ever had the Hepatitis B Vaccine (3 or more doses)? ☒ Yes ___ No If incomplete: ___
1 Dose ___ 2 Doses ___ No Doses ___ Already Immune

Root cause analysis and remarks:

* First aid was provided immediately after injury. As investigations, post exposure investigations were advised. The tests were done after getting consent from the patient. The investigations were done and the report was Non reactive for HBs Ag, HCV, tridot. As the tests were Negative post exposure prophylaxis was avoided.

Student is immunised for HBsAg previously. Student is sensitised and Motivated to practice Oral Health work safety protocol established by college.

Identification Number: NS-29

Date of report: 15/9/23

Date of exposure occurrence: 7/9/23

Time of exposure: 2.30 am / pm

1. How many uninterrupted hours had you been working when this exposure occurred?

2. Working Area:

A. Dental Laboratory

B. Dental clinics No. 03...

C. Sterilization Area

D. Post-Graduate Clinics (specify department _____)

E. Other areas (specify _____)

3. Professional Category:

A. Dental Faculty Specialty if any

B. Dental Nurse

C. Dental Hygienist

D. Interns

☒ Dental Student UG/ PG specify UG(III) BDS

F. CSSD Technician

G. Laboratory Technician

H. Attenders

K. Other (specify _____)

4. Have you had a previous exposure incident?: _____

Yes ☒ No

5. If 'Yes', How many times have you been exposed?: _____

6. Was the previous exposure documented?: _____ Yes

☒ No

7. Did the exposure involve:

☒ Blood

B. Saliva only

C. Blood and Saliva

8. Are you:

A. Right-Handed

☒ B. Left-Handed

9. Were you:

☒ Self-Exposed

B. Exposed by Another Person

10. Type of exposure:

A. Needle Injury

☒ 1. Syringe Needle Gauge

2. Suture Needle

B. Cut, Puncture, or Scrape by Other Instruments

1. Bur

2. Scalpel Blade

3. Wire (specify _____)

4. Hand Instrument (specify _____)

5. _____ Endodontic instruments (specify _____)

6. Scaler tips injury

6. Other (specify _____)

11. Describe the circumstances under which this exposure occurred. Be as specific as possible.

Patient came for extraction of 65. But restoration in relation to 37 was done but patient complaints of sensitivity so anesthesia was given. After giving inferior alveolar nerve block needle cap was kept closed. While giving infiltration while opening the needle cap accidentally got injured to my left hand middle finger.

12. Description of procedure in progress when exposure occurred:

- A. Oral Hygiene (e.g., prophylaxis, root planing, curettage)
☒ B. Restorative (e.g., amalgam, composite, crown)
C. Root Canal
D. Periodontal Surgery
E. Oral Surgery (1. Simple extraction 2. Surgical extraction 3. Fracture reduction 4. Other (specify _____))
F. Other than above mentioned procedures. (specify _____)

13. Where did the exposure occur?:

- A. Inside patient's mouth
☒ B. Outside patient's mouth
C. Unknown
D. Specify if any _____

14. When did the exposure occur?

- ☒ A. During use of the item
B. After use but before disposal
C. During or after disposal
D. During cleaning
E. Unknown

15. How did the exposure occur?

- A. While manipulating patient or instrument
1. Patient moved and jostled instrument or sharp item
2. While inserting needle in patients mouth
3. While withdrawing needle
☒ 4. Other (specify while opening needle cap)

B. During surgical procedures

1. Suturing
2. Incising

3. Other (specify _____)

C. Handling equipment

1. Passing or transferring equipment
2. Recapping (missed or pierced cap)

☒ 3. Removing needle from syringe

4. Assembling or disassembling equipment
5. During cleanup

6. During or after oral prophylaxis procedures

7. Other (specify _____)

D. Collision or contact with sharp object

E. Disposal-related

F. Other (specify _____)

16. Personal protective equipment being utilized at time of accident: (check all that apply)

- ☒ A. Single Gloves
B. Double Gloves
C. Utility Gloves
D. Mask
E. Goggles
F. Gown
G. Other if any (specify _____)

17. Circumstances contributing to this exposure: (Choose all that apply)

- A. Difficulty with procedure
B. Rushing Procedure
C. Pressure from environment
☒ D. Location of equipment (e.g. handpieces, scaler tip etc.)
E. Being distracted
F. Poor visibility
G. Poor positioning
H. Not following procedure steps correctly
I. Other (specify _____)

18. Description of exposure

- ☒ A. Needlestick
B. Puncture
C. Laceration
D. Scrape
E. Splash to Mucous Membranes
F. Other (specify _____)

19. Location of exposure

- ☒ A. Finger/Thumb
B. Hand, dominant
C. Hand, non-dominant
D. Face/Part of Face
E. Arm
F. Other (specify _____)

20. Depth of puncture or laceration

- A. Superficial scratch or puncture, no blood appeared
☒ B. Superficial scratch or puncture, some blood appeared
C. Deep laceration or puncture wound, blood appeared

21. Amount of blood/body fluid person was exposed to:

- A. None
B. Minor, less than a droplet
☒ C. Minor, more than a droplet
D. Large amount
E. Unknown

22. How was the wound or exposed area cleaned?

- A. Washed with water only
B. Soap and water
☒ C. Chemical cleanser (specify Betadine solution)
D. Other (specify _____)

23. Has the DHCW ever had the Hepatitis B Vaccine (3 or more doses)? ☒ Yes ___ No If incomplete: ___
1 Dose ___ 2 Doses ___ No Doses ___ Already Immune
